# Crop data analytics using non-image features

Data needed :

- Crop details
- Weather information
- Soil conditions
- Location
- Date of sowing
- Farm report
- Earlier advices

Dynamics of a single cotton crop :

Visualization of provided data

So far, though we have analyzed the data provided and observed some pattern, we were not able to draw much conclusion with this small data.

We need more data regarding advices and also other factors including Weather, Location, soil conditions, crop details, dates of sowing and farm reports to build the model.

Please provide us as much data as you can regarding the factors mentioned.

Thank you
